Re: Annual Inspection
01-0184

Dear Mr. Watson,

The Division received your operating permit application on December 5, 2012, for operation of a natural gas fired animal crematory (an air contaminant source). Based on the Division's file review, Construction Permit 956507I expired on January 1, 2004. However, this source continued to operate after the permit expired.

Division Rule 1200-03-09-.02(2) states in part:

No person shall operate an air contaminant source in Tennessee without first obtaining an operating permit from the Technical Secretary except as specifically exempted in rule 1200-03-09-.04 of this chapter.

The Tennessee Air Quality Act allows for enforcement action against individuals who violate the Act or its Regulations. The above described violation will be evaluated to determine if additional enforcement action is warranted. If you have any information that proves the violation did not occur, or if you have information that documents mitigating circumstances relative to the violation, you may submit that information in writing to the Technical Secretary, 9th Floor L & C Annex, 401 Church Street, Nashville, Tennessee 37243-1531. To ensure that information you wish to submit will be considered, it must be submitted within 20 days of your receipt of this **Notice of Violation.**

Mark Watson
